"The Alberta Wheat Pool Expects Every Pool Member Will Do His Duty."

IF AS ALL POSSIBLE

Deliver All Pool Wheat To Pool Elevators

Pool elevators can handle Ninety Per Cent. of all Pool
Wheat.

With a short crop this year it is imperative that Pool ele-
vators should handle as much grain as possible.

Pool members' safety and the protection of the Six Million
Dollars invested in Pool facilities demands that every possible
bushel of Pool wheat that can be delivered to a Pool elevator
should go there.

Two cents a bushel farm storage will be paid on all Pool
wheat held on farms until December 2nd, 1929.

M. D. Cereal

The council of the Municipal
District of Cereal No. 212, met
in the municipal office on Sat-
urday, August 10, 1929, at 10
a.m.

All members of the council
were present.

The minutes of the previous
meeting and the financial state-
ments were read and approved.

The secretary was instructed
to cancel the taxes against the
N.E. 28-4-4, on account of C.
W. Ostrander from 1923 to 1928.
Inclusive.

The secretary was instructed
to have 600 notices re appeals
from the assessment and to
send these out with the assess-
ment notices.

The taxes were ordered can-
celled from the N.E. 21-28-4-4
on account of W. Smith.

The secretary was instructed
to communicate from Wood
Buchanan and MacDonald Re-
an account from the Royal Al-
exandria Hospital, Edmonton,
and also regarding applicant
for Pension from Old Age Pen-
sion Board.

Three by-laws re, borrowing
for Municipal and School pur-
poses were given three read-
ings.

The balance of the arrears of
taxes left from the sale of Lots
2 and 3 Block 2, Open Plan 3732,
were ordered cancelled.

Roadwork pay sheets for all
divisions were passed.

The accounts were passed.

The council adjourned to
meet again on Saturday, Sep-
tember 14, 1929 at 10 a.m.

J. P. Horaback, Sec. Treas.

M. D. Golden Centre

The 5th. meeting of Council
of the M. D. of Golden Centre
No. 272, was held at the N.E. 13-
30-5-4, on August 1.

Members all present.

Council called to order by
Reeve and business transacted
as follows:

Minutes read and confirmed.
Correspondence read and dis-
posed of.

Dept. of Interior was re-
quested that in event of School
lands under lease being sold,
that they pay for the plowing
and if land reverts to them that
they destroy all noxious weeds.

Petition was received and
granted to open roadway from
Hamlet of Neco, on south side
of Railway through section
33-31-6-4.

Financial Statement to Aug-
ust 1, was read and accepted.

Following accounts were
paid: Western Municipal News
for safe, \$50.00; H. McLean,
standing cutter, 4.50; M. Kerr,
blacksmith, account 12.85; E.

Ellertson, drying safe 1.50;
Cereal Recorder, sale notice 3.00;
Central Alta. San., re W. J.
Evans 138.00; Chapman-Slosser
Agency, premium on Walper
bond 5.00; B. F. Mitchell, survey
90.50; Empire Lumber Co., ed-
wards ward 3, 37.15; Ralph
Greene, salary for July 123.30;
Office expense 20.00; Mrs. O.
Michaels, rent 6.00; Grants
Oyen Agri. Society 100.00; Chin-
ook Agri. Society 72.00; Oyen
School Fair 15.00; Cereal School
Fair 25.00; Sedalia Neco School
Fair 20.00; George Cole, unload-
ing culverts 2.50; R. J. Ty, sign
at road diversion 8.00; Assisting
surveyor, Ed. Stewart 2.00; A.
Jorgenson, 2.00, and R. Cates
2.00; M. Fletcher, blacksmith
account 3.00.

S. S. B. was requested to pay
account for filling well on the
S.W. 28-5-4.

John Bulme was given the
wire on N.E. 24-30-4-1, in settle-
(Continued on page 2.)

Wheat Pool Notes

Over 400 agents of Alberta
Pool Elevators were assembled
in Calgary last week at a four
days' convention, and every
phase of the Pool Elevator busi-
ness was fully discussed. H.
W. Wood, Chairman of the
Board of Directors of the Al-
berta Wheat Pool in his open-
ing remarks strongly recom-
mended that the agents would
best serve the Pool's interests
by dealing with the members
with the utmost fairness. He
pointed out there was no inco-
sistent under the Pool system of
elevator operation for any
agent to deal unfairly with any
member. The Pool Elevator
system is not operated for pro-
fit, Mr. Wood declared, but solely
on the basis of service to the
membership.

R. D. Purdy announced at
the Convention of Pool Elevator
agents that the Alberta
Wheat Pool now owns 135 ele-
vators spread over the length
and breadth of this province.
This is an increase of approxi-
mately 135 over the number
operated last year, and makes
the Alberta Pool easily the
largest elevator organization in
Alberta. The Pool has now
facilities to handle approximately
90 per cent of all Pool
wheat.

The Alberta Wheat Pool will
pay farm storage to Pool mem-
bers who hold their wheat on
their farms until Monday, Decem-
ber 2, the amount being two
cents per bushel. This decision
was recently arrived at by the
Directors of the organization.
Last year the Pool paid farm
storage on a different plan, 1
cent per bushel being paid on
wheat held until December 1st,
and an additional 1 cent for
wheat held on farms until
March 1st.

Hail Storm Flattens Crops

A hail storm which occurred
shortly after three o'clock in
the afternoon, last Saturday,
did considerable damage south
of Benton and Sibbald. Start-
ing just west of Oyen it travel-
ed eastward covering a strip
about three miles wide. Farms
lying in the centre of the path
of the storm, had their stand-
ing crops literally pounded into
the ground and among those
reported to have suffered a 100
per cent loss are Wm. Denton,
Richard Meade and A. C. Thom-
as of Benton, and T. Donovan
of Sibbald. A number of others
report damage varying from
ten per cent to 80 per cent.

Rainfall for Four Days 1.06 Inches

The first rainfall in the month
of August occurred Thursday
evening and continued through
the early hours of Friday morn-
ing, precipitation amounting to
.32 inch. This was followed by
a sprinkle on Friday night
amounting to .02 inch. On Sat-
urday afternoon a heavy show-
er commenced at 3.30 and later
returned to hail, the duration of
the storm was 39 minutes, dur-
ing which time precipitation
amounted to .53 inch. The
damage from hail in the vicinity
of Oyen was only slight but
increased as it travelled east to
the south of Benton and Sib-
bald. Another short heavy
shower occurred on Saturday
shortly after 6 p.m., the gauge
recording .11 inch. On Sunday
evening about 10 p.m., a light
shower produced another .02
inch, bringing the total for the
month to date to 1.06 inches.

GREAT

End-of-the Season Sale

"GOINSUM" This Sale is going some, far
beyond our expectations.
The only reason we can give is our remarkable price
reductions. Our friends and patrons are taking ad-
vantage of these savings. Our counters are full of
new bargains for this week's selling. This is a great
opportunity for thrifty shoppers.

BRITAIN TAKES A FIRM STANCE ON REPARATIONS

The Hague—Deadlock again seems to threaten the vexed question of reparations. Great Britain is firm in her opposition to the Young plan evolved at the recent conference of experts in Paris, and France, Italy and Belgium seem equally determined to oppose any change in the scheme.

Rt. Hon. Philip Snowden, chancellor of the exchequer, outlined the British position and said his country had sacrificed its own interests to the utmost limits and would yield no further. Mr. Snowden made his statement before the financial committee of the 1929 conference of The Hague, gathered to consider the Young plan.

While he hoped the other delegates would regard it as a suggestion, Mr. Snowden said he would not be surprised if they did not. He said he would not be surprised if they did not.

The British Government, he said, did not accept the view that the reparations problem was a purely financial one. It was a political question, and he declared that he would not accept the shares in the reparations annuities proposed by the committee of experts, as he would not consent to the division of annuities into conditional and unconditional parts, and the annuities of approved of continued deliveries in kind.

Mr. Snowden did not consider it a sacrifice on the part of France to give up something she would never have received. If sacrifices were to be talked about, he would have something to say about Great Britain's sacrifices.

No single country had made anything approaching the sacrifices made by Great Britain, he continued, but the British had never complained. Great Britain entered the war not because any of her material interests had been endangered but to support treaty rights in defence of world security. She willingly did that, willingly sacrificed her blood not in her own interests.

No country had been left with Great Britain's war debt which was \$132,500,000,000. At the end of the war, Great Britain's war debt was \$132,500,000,000. At the end of the war, Great Britain's war debt was \$132,500,000,000. At the end of the war, Great Britain's war debt was \$132,500,000,000.

The British taxpayer would be burdened for the next thirty years with the annual payment of \$300,000,000. The Young committee, Mr. Snowden argued, had no right to interfere with the 84 payments.

Mr. Snowden continued the payment of reparations in kind by Germany affected Great Britain's export trade disastrously.

He emphasized his stand that the British delegation must have a decision on the points raised before the committee could proceed any further or discuss any other matters.

"I have behind me the unanimous support of my government," he added, "and of the House of Commons, irrespective of party, and I believe, of all the people of Great Britain. I speak quite frankly when I say I cannot compromise on the matter. The House of Commons would never ratify the Young report in its present form."

Railroad May Be Sold

British Columbia Likely To Get Rid Of Pacific Great Eastern

Victoria, B.C.—The Pacific Great Eastern road may be expected to be removed from the people of this province within a very short time. Mr. P. P. Foster, attorney-general, said, speaking at the Esquimalt Conservative picnic at Esquimalt.

The Pacific Great Eastern, owned by the Government of British Columbia. A survey of the line and its territory is now being made jointly by the province, Canadian National and Canadian Pacific railways.

Negotiations Break Down

Tokyo—Japanese despatches from Manchuria, Manchuria, where representatives of Russia and China have been discussing the future arising from Chinese seizure of the Chinese Eastern Railway, reported that the negotiations had broken down.

British Airship May Be Zeppelin's Rival

Hope Machines Nearing Completion Will Be Much Faster

London, Eng.—Cabled reports from Lakehurst that the Graf Zeppelin's successful trip to America probably would be followed by the establishment of a regular trans-Atlantic air line brought considerable speculation in London morning papers as to the possibility of British competition.

Greater speed or at least a cut in elapsed time of the trips was held to be a necessary prerequisite of such a line and the hope was expressed that two British giants now nearing completion, the R-100 and R-101 would prove much faster.

Sir Dennis Burney, M.P., head of the company which built the R-100, in a talk with the Daily News opined that the Graf's time did not give margin enough over fast steamers and an airship to be successful must be able to make a trip in sixty hours outward and 48 returning. This would imply a cruising speed of 90 miles an hour.

Resignation Of Grain Board

New Members Will Be Appointed At An Early Meeting

Ottawa.—All the members of the Board of Grain Commissioners of Canada have resigned, their resignations to take effect August 15. On that date the names of the new commissioners will be given out.

Announcement of the resignation of the members of the grain commission was made by Hon. James Macdonald, Minister of Trade and Commerce, at the close of a cabinet sitting here.

Mr. Macdonald said that the new commission would make its own selection for the posts of assistant commissioners after it was appointed.

The resigning members of the grain commission are: Chief Commissioner H. H. Hogg, K.C., and Commissioners Matthew Snow and James Robinson.

The new commission will also consist of three commissioners, but four assistant commissioners will also be appointed.

New Administration Has Assumed Office

Took Oath Before Premier S. F. Victor, Right Hon. Francis

Anglin, P.C., Chief Justice of Canada became administrator of the province of Canada when he took oath of office in the office of Premier S. F. Victor, of British Columbia. Following the ceremony, His Excellency issued a proclamation announcing his assumption of office as administrator of the province. A second proclamation appointed Hon. Mr. Justice P. B. Maguire, of Montreal, as administrator of the province, and authority to sign documents of urgent character.

Mr. Snowden continued the payment of reparations in kind by Germany affected Great Britain's export trade disastrously.

He emphasized his stand that the British delegation must have a decision on the points raised before the committee could proceed any further or discuss any other matters.

"I have behind me the unanimous support of my government," he added, "and of the House of Commons, irrespective of party, and I believe, of all the people of Great Britain. I speak quite frankly when I say I cannot compromise on the matter. The House of Commons would never ratify the Young report in its present form."

British Atlantic Fleet

Now Becomes the Greatest Single Fighting Force In the World

London, Eng.—The Atlantic fleet becomes the greatest single fighting force in the world by the addition of the Admiralty to eight battleships of the Queen Elizabeth class from Mediterranean waters to home ports and the Atlantic.

The transference of the battleships, not only an important change in distribution of the navy, but an entirely new departure in British naval policy, means the balance of power is removed from Malta and Gibraltar to the Atlantic.

The Atlantic fleet will consist of 14 capital ships, among them the two most powerful vessels in the world, the Rodney and Nelson, and the largest battle cruiser in the world, H.M.S. Hood.

The Queen Elizabeth vessels are approximately 30,000 tons, armed with eight 15-inch guns. These will join the two Iron Duke battleships, the Hood, the four Iron Duke battleships and the battle cruisers, Renown and Repulse, to make the most formidable fleet assembled on peace time duties in the world.

PER CAPITA SALE OF LIQUOR IS IN EXCESS OF \$10

Ottawa, Ont.—Liquor sales in 1928 through provincial government stores totalled \$107,694,284, rather more than \$10 per capita over all Canada.

Figures on the liquor traffic in Canada, covering sales in eight of Canada's nine provinces, were released by the Dominion Bureau of Statistics. Government control is in effect in all provinces excepting Prince Edward Island and Nova Scotia.

Total government revenue from the liquor traffic during 1928 amounted to \$72,500,361. Of this amount, \$49,800,291 rolled into Dominion coffers, while the remainder, \$22,700,070, accrued to the provinces.

Less than one-third of Saskatchewan's total liquor board revenues appear under ordinary revenue, while more than \$400,000 distributed to municipalities does not show on the province's accounts.

Ontario and Quebec record by far the highest revenue totals among the provinces, their combined total aggregating two-thirds of the Dominion's aggregate. Ontario's revenue amounted to \$8,120,380, and Quebec's to \$7,000,000. Alberta with \$2,765,000, and British Columbia with \$2,752,229, are next, though the former total actually includes the revenue for 15 months.

No single province among the remaining ones showed a revenue for 1928 amounting to more than \$1,000,000. Manitoba, however, had a total of \$926,163, and the totals would have been much larger had the breweries in that province been permitted to sell beer direct to permit-holders. Other provincial revenue totals are: Saskatchewan, \$600,000; New Brunswick, \$335,027; Nova Scotia, \$241,931.

Seven provinces are represented in the figures of gross sales reported by provincial liquor control boards—Prince Edward Island and Nova Scotia being omitted. Ontario's total is double that of the next highest, Quebec, amounting to \$48,990,591 of the Dominion's aggregate of \$107,694,284. Quebec is next with \$24,229,624. British Columbia and Saskatchewan are the only other provinces whose sales grossed more than \$100,000, the former reporting \$18,090,910 and the latter \$11,708,534.

Eight Killed In Riots

Jute Mill Strikers In Calcutta Clash With Police

London, Eng.—Calcutta despatches to The Daily Mail said eight persons were killed and 20 injured in a fight between jute mill strikers and watchmen and police at Naihati, 240 miles north of Calcutta.

A strike has been in progress for several weeks in the area after workers protested introduction of the six-hour week. Forty per cent. of the looms in the Calcutta area are stopped, and about 12,000 workers made idle.

Patrol Ship Returning

Ottawa.—The Canadian patrol ship "Boothby," has reached the northern apex of her summer voyage at the mouth of the Mackenzie river on August 3, after a cruise of 1929 expedition. She reached Bache Peninsula, Ellesmere Island, the most northern police post and post office on August 3 and is now heading south, bringing out Inspector A. H. Joy, of the Canadian Mounted Police, who has just completed a northward patrol of 1,800 miles.

Drops Freedom Of Seas Issue

Toronto.—A special dispatch to the Mail and Empire from Washington says: President Hoover has dropped the freedom of the seas issue out of his disarmament program, not only on the theory that it does not jibe with the Kellogg anti-war pact, but because he believes naval parity with Great Britain is the only real guarantee of freedom of the seas.

POPULAR FIGURE IN LONDON SOCIETY

Native Of Winnipeg Well Known To Public For Many Years

Chicago, Ill.—Mary MacLane, a successful author 15 years ago, died August 6, in a lonely room on the fringe of Chicago's black and tan belt. She was born in Winnipeg in 1881.

Author of "I, Mary MacLane," "Men Who Have Made Love To Me," and other romantic writings, Miss MacLane had vividly disappeared. It was some time after her death that it was realized that she was the Mary MacLane whose own romantic adventures as set forth in her books had stirred the imaginations of the reading public of a few years ago. No one was at her bedside as she died. Her body was found by the proprietor of the small hotel where she had lived for the last four years. Her death, a doctor's certificate said, was due to natural causes.

Miss MacLane's retirement about six years ago was believed to have been caused by disappointment. It came after the sale of her new books had fallen off and financial reverses set in. Ill-health added to her troubles.

Lady Lettice Lygon, daughter of the Earl and Countess Beauchamp, is a popular figure in London society. A feminine journalist, she is famed for her beauty and wit.

The "I'm Alone" Case

Eminent Counsel For Canada and United States To Act As Arbitrator

Ottawa, Canada, has elected Eugene Lafleur, D.C.L., LL.D., K.C., eminent counsel of Montreal, as Canadian arbitrator in the "I'm Alone" case. The government of the United States has appointed Willis Van Devanter, associate judge of the Supreme Court of the United States, as its member.

Announcement of the selection was made simultaneously in Ottawa and Washington.

At the same time, the Department of External Affairs at Ottawa, announced that John E. Reed, K.C., of the Nova Scotia bar and legal adviser of the department, had been appointed Canadian agent in the case.

Counsel for the Dominion of Canada in the case was W. N. Tilley, K.C., of Toronto, and Alime Godfrin, K.C., of Montreal.

At the Department of External Affairs, it was announced recently that there would probably be a lapse of some time before the arbitrators in this famous case actually would sitings. Counsel for both parties will have to get to work on the case, and there must be an exchange of pleadings, which may occupy considerable time.

Not until the preliminaries have been disposed of will there be a definite decision as to the place or places where sittings will be held. It has been taken for granted that some of the sittings at least will be held in Washington, but there is a possibility that there will be others, possibly some in Ottawa.

Plan New Air Route

Chicago To Puget Sound Via West Coast Airways

Chicago, Chicago will be brought to within 22 or 23 hours of Puget Sound cities along the northwest by a new air-liner passenger route, Col. L. H. Britten, general manager of Northwest Airways, announced here. Britten said an agreement has been reached with Western Canada Airways, Ltd., which plans to operate along the southern Canadian border from Winnipeg to Inland and Victoria.

Northwest Airways will extend its line to Winnipeg and make connections with the Canadian company.

Noted Aviator Visits West

Winnipeg, Man.—Going to the Pacific coast on a trans-continental air tour, Captain J. H. Parkinson, noted Canadian pilot, of Montreal, Quebec, left Montreal, July 22, and has made 13 stops at various eastern cities and towns. En route to the Pacific coast, the Montreal aviator will visit various prairie cities.

WON HONORS AT BISLEY MEET

The photograph here shows: (1) Lieut. Desmond B. R. Blair (3), Vancouver, after a tie, the King's prize to Lieut. Col. M. Blair (3), Vancouver, at the Empire meeting of the National Rifle Association, at Bisley, England; and (2) M. E. Ennis, C.S.M., Toronto, who was the champion of the City of London Cup.

Canadian Authors Dead

Native Of Winnipeg Well Known To Public For Many Years

Chicago, Ill.—Mary MacLane, a successful author 15 years ago, died August 6, in a lonely room on the fringe of Chicago's black and tan belt. She was born in Winnipeg in 1881.

Author of "I, Mary MacLane," "Men Who Have Made Love To Me," and other romantic writings, Miss MacLane had vividly disappeared. It was some time after her death that it was realized that she was the Mary MacLane whose own romantic adventures as set forth in her books had stirred the imaginations of the reading public of a few years ago. Miss MacLane's retirement about six years ago was believed to have been caused by disappointment. It came after the sale of her new books had fallen off and financial reverses set in. Ill-health added to her troubles.

Lady Lettice Lygon, daughter of the Earl and Countess Beauchamp, is a popular figure in London society. A feminine journalist, she is famed for her beauty and wit.

To Halt Liquor Smuggling

Federal Government To Co-Operate With U.S. In This Connection

Ottawa.—The Dominion Government is studying ways by which it can more effectively co-operate with the United States in the suppression of liquor smuggling across the border. The question was again brought before the cabinet at a recent session.

At the conclusion of the meeting, Premier W. L. Mackenzie King said, "Since United States have become so anxious in preventing liquor smuggling, it seems appropriate that further measures of co-operation should be considered by the Canadian Government." The prime minister indicated there might be an announcement in a few days of new legislation, the way of co-operation in suppressing the traffic.

At the Department of External Affairs, it was announced recently that there would probably be a lapse of some time before the arbitrators in this famous case actually would sitings. Counsel for both parties will have to get to work on the case, and there must be an exchange of pleadings, which may occupy considerable time.

Not until the preliminaries have been disposed of will there be a definite decision as to the place or places where sittings will be held. It has been taken for granted that some of the sittings at least will be held in Washington, but there is a possibility that there will be others, possibly some in Ottawa.

ANGLO-EGYPTIAN DRAFT TREATY WELL RECEIVED

London, Eng.—British military occupation of Egypt, except for the Suez Canal zone, is abandoned and other important far-reaching reforms agreed to in the new Anglo-Egyptian draft treaty, details of which were issued from Downing Street by the foreign office.

The proposals are a great advance on anything hitherto offered as settlement of the Anglo-Egyptian problem, being considered even more favorable than was the draft treaty of 1927, which was rejected by the Egyptian Parliament under the influence of the followers of the Nationalist leader Zaghal Pasha. The agreement, which Right Hon. Arthur Henderson, foreign secretary, has negotiated with the Egyptian Premier, Mohammed Pasha, Mahmud, in a private way follows the lines of the abortive treaty of two years ago, but makes important concessions to Egypt.

The British occupation will cease and British troops will be withdrawn from the Suez Canal zone. The British Government will use its influence to induce other powers to consent to the abolition of the capitulations of extra-territorial rights and will assist Egypt to become a member of the League of Nations.

Great Britain recognizes that the protection of foreigners in Egypt is a matter devolving solely upon the Egyptian Government. The protection of minorities was one of the "reserved" points of the British Government two years ago, but it is now admitted that that will be exclusively the concern of the Egyptian Government. The variations of 1927 will give Egypt a greater measure of independence rather than ever before proposed.

The most important concession on Great Britain's part is the withdrawal of British garrisons to the canal zone. This was refused in the negotiations with Sarwat Pasha two years ago. Sir Austen Chamberlain, then secretary of state for foreign affairs, had cut this as a possibility ten years hence.

Mr. Henderson in a note to Prime Minister Mahoud, stipulates that these new proposals must first be approved by the newly elected Egyptian Parliament before they can be submitted to the British Parliament for approval and embodied in the treaty.

Willing To Leave Rhineland

London, Eng.—The Exchange Telegraph Company said it had learned on good authority British delegates to The Hague conference had decided to leave the Rhineland. It is expected that the British Government would accept such an agreement unconditionally.

May Import Welsh Coal

London, Eng.—There is a likelihood of an increase in the exports of Welsh coal to Canada, amounting to 2,000 tons a year, as a result of the forthcoming visit to the Dominion of Right Hon. Thomas, Minister of Employment, according to The Manchester Guardian.

All products exported from Spain are to have a national label.

W. N. O. 1708

WOMEN IN SENATE QUESTION TO BE DECIDED SOON

Ottawa.—Brief comment on the reference to the Privy Council as to the eligibility of women to sit in the Senate of Canada was made by Hon. Lucien Cannon, minister-general, who returned to Ottawa after an absence of two months. While abroad Mr. Cannon represented the Dominion in a number of cases before the Privy Council. Mr. Cannon explained that he did not appear before the Privy Council in connection with the reference to determine the right of women to sit in the Senate. The case had been argued by Hon. Eugene Lafleur and Hon. N. W. Rowell, K.C.

"As the case is now pending, I cannot say whether any comment thereon," Mr. Cannon said. "I may say, however, that the question before the court is not whether women should be eligible to sit in the Senate, but whether, under the present wording of section 24 of the B.N.A. act, women may be appointed to that body. The principle of the admissibility of women to the Senate is not discussed, but the government seeks from the Privy Council a decision on the method whereby they could be appointed. The question was fully argued by the two learned counsel and judgment in the matter has been reserved."

New York Opposing Italian For Mayor

Tammany Hall Fighting Election Of Congressman La Guardia

New York.—There are 292,225 foreign born Italians in New York City, and 410,721 whose parents were foreign born. That's one reason why Tammany Hall is so anxious to win action, deploying its forces and getting out for a devastating fight against Fiorella H. La Guardia, who was grudgingly handed the nomination for Mayor of New York at the Republican convention.

Congressman La Guardia is a formidable campaigner. His verbal attack on Tammany Hall is like the last year. For months he has been indignantly at work, fanning up his own popularity, from backwoods to backwoods.

New Manitoba Industry

Plant To Manufacture Explosives May Be Built Soon

Winnipeg.—The Manitoba Free Press publishes the following: "Rapid development of mines in northern Manitoba has led Canadian Explosives, a Canadian Industries, Limited, to purchase approximately 1,000 acres of land in the vicinity of the Selkirk, in the north of Winnipeg, upon which to erect an explosives plant. The enterprise involves an investment of approximately \$700,000.

"Date of construction of the plant is contingent upon mining developments in the Selkirk area, and the plant will be producing before the end of 1930."

Making Trip To Coast

Ottawa.—Hon. Jean Knight, French minister to Canada, has left on a three-weeks' trip to the Pacific coast. The trip will mark his first visit to Vancouver since his appointment last October. The minister will stop at Winnipeg, Regina, Calgary, Edmonton and Victoria. Hon. Mr. Knight will speak at a number of Canadian clubs and chambers of commerce in the west.

Willing To Leave Rhineland

London, Eng.—The Exchange Telegraph Company said it had learned on good authority British delegates to The Hague conference had decided to leave the Rhineland. It is expected that the British Government would accept such an agreement unconditionally.

May Import Welsh Coal

London, Eng.—There is a likelihood of an increase in the exports of Welsh coal to Canada, amounting to 2,000 tons a year, as a result of the forthcoming visit to the Dominion of Right Hon. Thomas, Minister of Employment, according to The Manchester Guardian.

All products exported from Spain are to have a national label.

W. N. O. 1708

Apple Growing In Manitoba

Problem Of Quality And Flavor Is Being Worked Out

The prospect of 6,000 boxes of apples being gathered from the orchards of the Dominion Experimental Farm at Morden, will be distinct news and highly interesting to people of the other provinces east and west. There are, as a matter of fact, many different parts of Manitoba where the possibility of growing apples has been proven, and one only needs to attend the annual exhibition of the Manitoba Horticultural Association, in Winnipeg, to see the varieties of apples that are produced, some of them of very attractive appearance.

The first requisite was a fruit that was hardy enough to stand this climate. The next step is to add quality and flavor to hardiness. This problem is now being worked on and there appears to be good promise of success.

There seems to be no reason why every farm in Manitoba could not, in time, have its own orchard and a home supply of reasonably good apples. The possibility of extending farm production in this interesting way might be expected to make a rather strong appeal. — Manitoba Free Press.

Prairie Soils

They Rank Among the Richest Of Known Soils

A knowledge of the characteristics of soil is essential to successful farming. The continuous cropping of prairie soils is made possible through the large proportion of vegetable matter they contain and the nitrogen they possess.

Dr. F. L. Shutt, Dominion Chemist, has made a very comprehensive study of prairie soils, and those who are interested in the nature and composition of them, will find much to consider and study in his bulletin number 22, entitled "Western Prairie Soils."

He says the analysis of samples has proved that in many districts the prairie soils contain the elements of fertility in such a degree that they rank among the richest of known soils.

The Publication Branch, Department of Agriculture, Ottawa, will forward this bulletin on application.

Alberta Farm Production

Total Production For Last Year Is Placed At \$261,607,299

According to figures published in the last press farm production in the Province of Alberta, during last year totalled \$261,607,299. This figure includes \$117,068,000, produced by the wheat crop. The report indicates that 15,220,135 acres of land were under cultivation. The figures for the previous year are not given. The report indicates that \$106,253,035 was produced by livestock in the province last year.

Waterfowl Census

The National Parks of Canada, Department of the Interior, and the United States Biological Survey, are co-operating in the taking of monthly waterfowl censuses throughout Canada and the United States. These censuses are being taken in order to obtain information concerning the numbers, distribution, and migrations of wild ducks, geese, and coots throughout both countries for the purpose of aiding in the administration of the Migratory Birds Convention Act.

The Modest Violet

Teacher (stressing the difference between the rose and the modest violet): "Now a well-dressed old lady goes along the street but is proud, and greets nobody—that is the rose; behind her goes a small creature with bowed head—"

Pupil: "That is her husband."

"What are you doing here?" "There is going to be a storm and I have to stay here." "Why?" "Mummy hasn't time to wash me." —Piggs Gales, Vernon.

W. N. U. 1708

Rubber Camp Is Interesting

Tools Used By Rubber-Collector Are Very Simple

In the trackless forests of Northern Brazil (forests) (wild rubber-trees) abound. The rubber-collector's tools are a number of tin cups, an implement for cutting through the bark of the tree, and some palm fronds. He taps the tree with his sharp instrument and ties one of the tin cups under the incision. Then he repeats the process on as many trees as he can deal with in an hour. By the time he has finished the first recapping he will be filled. He empties the contents into a pail, and then repeats the process with the other trees. When his pails are full he kindles a fire of some handy material—usually the nuts of a certain palm which emits a pungent black smoke, and sets an empty pail with a hole in the bottom upside down over the fire. The smoke rises up through the hole. Then the operator takes a long cut-shaped piece of wood, and dips the broad end into a pail filled with the "milk." Its surface it at once covered with a thin film he considers of value. Then he thrusts the "paddle" into the smoke. As it by magic the film congeals. He again dips the stick into the smoke, and giving another firm round the new surface. When the mass on the end is of suitable size—about two inches thick—it is separated by a knife with a sharp blade, and the rubber is ready for market.

Dog Provided Proof

Recognized Master's Coat and Satisfied Farmer's Office

A friend of mine (writes a correspondent), who left a London-bound train in the Midlands, and forgot to relieve his coat from the baggage rack, wired to his father to go to the London terminus to claim it. When the parent, accompanied by his son's dog, went to the parcels office he quickly identified the coat but was unable to provide any proof that he had any legitimate claim to it. He was about to depart when the dog, which had been inquisitively exploring the place, suddenly encountered the coat hanging from a peg, recognized it at once, sniffed, and set up a joyous barking. The attendant asked for no further proof, and the coat was instantly surrendered.

When That Day Comes

When the Rockless Drive Is Eliminated, Motoring Will Become a Pleasure

When the highways are cleared of drivers who cut in and out of congested traffic lines, who try to pass other cars at crossing intersections and on hills, who ignore the warning signs and think the white lines on pavements were painted there for the guidance of the other fellow, who travel at high speeds on wet roads, and operate cars equipped with blinding headlights—then will motoring become the pleasure it should be instead of just a throw of the dice with fate. The hazards will not be taken from our highways overnight, but they can be eliminated gradually, and it is something to note that Hon. Mr. Henry has decided himself to take the Exchange.

Early Forest Fire Patrols

The Forest Service of the Department of the Interior, has found that, by the use of aircraft equipped for winter flying, it is now possible to commence the patrol of forest areas in Manitoba and Saskatchewan in March instead of late May, as formerly. In this way fires started by trappers, prospectors, and others, during the winter months, are detected and reported, and means taken for their suppression before they attain serious proportions.

Motor Vehicles In Saskatchewan

The year 1929 promises to show a big increase in the number of motor vehicles in use in the Province of Saskatchewan, as compared with last year. According to statistics prepared by the motor license branch of the Provincial Secretary's Department for the first six months of this year, 117,132 vehicles, exclusive of motorcycles, are now in use—only 4,185 less than the total for all of last year.

Teacher: Margaret, use "officious" in a sentence.

Margaret: "When Mary and John fell in the lake he holloed, 'Oh, fish out!'"

"So your wife went away for her health. Why did she have?" "Five hundred dollars of my money."

There will come a thrashing time for those who sow wild oats.

The Friendly White Tent At The Fair

Once a year in Alberta the last of West goes wild and woolly, when every city, county town, and village holds its annual Stock Fair and Exhibition. From far and near come the farm folks in gala attire, riding their modern "covered wagons" into the nearest auto camp, and there depositing their families, and three depositing their grain, the stock, the garden produce, the cooking and sewing, and thus is seen a microcosm of country life, and the story of pioneering is often like an apple poem. Out of the virgin forest has been hewed a garden, blossoming like the rose, giving food for man and beast, in a soil near which may be found the ancient remains of dinosaurs and other primeval monsters! In many fairgrounds may be seen a little white tent with a well-known emblem floating in the breeze. It is the Red Cross First Aid and First Aid Station. While the crowds are eagerly watching the races, the bucking contests and games, infants are slumbering in rows in wicker cots, baskets, improvised as cradles for the nonce.

Young mothers in rocking chairs are nursing the latest little princeling of the house, sometimes but three weeks old.

By means of posters and photographs and many attractive models the great work of Red Cross is featured and lessons on "better health" and its part in family life are taught by Red Cross attendants. Strangers from other lands are invariably interested in the friendly gesture of Red Cross with its warm human understanding of home problems.

Canadian Wheat In Japan

Japanese Miller Says Canadian Wheat Has Supplanted United States Product

Quality and price are the factors which have enabled Canadian wheat to supplant the United States product in the Japanese market, declared Mr. Tsuchiro Shoda, "four king of Japan," president of the Nishan Flour Mills Co., Limited, while in Vancouver in the course of a trip which will take him to the wheat centres of Canada, the United States and Europe. The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver.

Fear From Soga Beans

It has been reported at London, England, that a new British industry will shortly spring up which will manufacture flour, adaptable to bread making, from soga beans. The soga bean has been known as far back as 2538 B.C., and only recently it has been used as cattle fodder. A Viennese scientist, however, is said to have prepared a bread flour from it which would go no farther.

Wife: "Well, the maid's gone. Said you wanted her over the telephone." Hubby: "Too bad—I thought I was talking to you."

THE END OF THE JOURNEY

No. 18, Home—440 yards, Par. 4.

There may be some as beautiful, but certainly none more so, than the 18th hole of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian Amateur and Western Canadian Amateur Championships will be played August 19-24, and the Silver Telet Pole Tournament, September 7-14. Mountains, lake, woods and a perfect fairway all go to make up one of the most attractive holes in golf. The green has been made generous in size, is splendidly conditioned and cleverly trapped.

The photograph shows the hole just in front of the tee, and below it is a plan in detail with yardages marked to scale.

Romantic Names Of English Trains

"Flying Scotsman" Of Passenger Service Vies With "Flying Pig" Of Freight Service

No American sojourning in England ever gets homesick for trains with fancy names. Here, as on the railways of the United States, it is possible to get screaming across the land under a 45 ton load.

Between London and Edinburgh one can ride the "Flying Scotsman," race north on the "Royal Scot," fly railwaying with a feminine touch on the "Queen of Scots."

Bound for Paris one can travel on a bilingual express—it's the "Golden Arrow" on the English side of the Channel, and the "Fleche d'Or" on the other. The "Southern Belle" seems to promise a trip to the land of cotton, but it's really just the parlor car way of getting from London to the sea at Brighton.

Even the locomotives carry names like "Sir Christopher Wren," "George V," and "Howard of Ealingham," but the train under an 45 ton load represents the partiality with which names are showered upon Pullman sleepers in his own country, it is finding English freight trains leading names.

Here, of course, they are not "flying trains," but "good trains." There is, for example, that crack goods train called the "Flying Pig." If anything can make a freight train romantic, it is a name like that. And then there is the "Grimsby Fish," which races down to London from Grimsby with fresh fish for English appetites.

The "Southampton Meat" is the butcher's favorite, as might be expected, its headlines being refrigerators to the metropolis in refrigerator cars loaded at Southampton, where the meat of England comes in from Argentina and New Zealand. "Pigs" and "Fish" and the "Meat" are feverishly in earnest about their importance; they rush about at high speed. But the public has no attention to them, for they do most of their work in the middle of the night when the public is sound asleep.

Swiss Invented Man's Hat

When First Manufactured In England They Were Heavily Taxed

The first man in England to wear a tall hat of the "topper" variety was a Swiss. His appearance on the streets of London created a sensation, and it was stated in Court that the extraordinary and terrible sight caused some women to faint. The hat, as an article of man's attire, was invented in Paris in 1804. It became very popular. It used to be the custom of Popes, in solemn conclave, on Christmas Eve, to wear hats of violet, silk, lined with ermine and embroidered with gold and jewels. These blessed hats were sent to princes and commanders of armies as a mark of honor. The Jews of Spain were formerly compelled to wear yellow hats, and the German soldiers of the Napoleonic wars wore green hats. Hats were first manufactured in England in 1811, and until 1785 were heavily taxed.

Names Must Be Changed

Law Prohibits Use Of Bolshevik Names For Italian Children

Names in Bologna public schools who bear unchristian or bolshevik names, which were imposed on them by their parents during the "Red intoxication" period in Italy, must change them to Christian names which correspond with national tradition and the spirit of modern times.

The civil court has ruled that bolshevik names, such as "Albino," "Lenin," "Anarchist" and "Libertarian"—all of which are names of Bologna boys—must be changed. The decision was made at the request of city authorities under a law prohibiting imposition of names contrasting to the present moral atmosphere of the country.

Among the girls' names which must be changed are "Vengeance," "Dynamite," "Liberty," and "Internationale."

Young Man: "How's my sweetie, doctor?" Doctor: "She has improved wonderfully, young man."

Young Man: "Doc, I don't see how she could. She was perfect before."

Mrs. Reading: I admit I prefer the old things. I just don't see "The House of Seven Gables."

Mr. Flashman: Never heard of it. What does it rent for?

He: "Are your neighbors baseball fans?" She: "I guess so—they're always yelling at each other."

Earncliffe May Become Shrine

Stately Home Where Sir John A. Macdonald Lived, Rich In Historical Associations

What will become of Earncliffe, the stately gray stone house overlooking the Ottawa River, where Sir John A. Macdonald lived for several years and where he died? Many suggestions are being made, since the death of his son, Dr. Charles Harris, distinguished musician, as to what should be the future of the residence, rich in its historical associations.

During the life time of Dr. Harris, the suggestion was frequently made that it be purchased by the Conservative party and be made the official residence of the leader of that party, much as Laurier House, for many years the home of Sir Wilfrid Laurier, has become the official residence of the leader of the Opposition. Dr. Harris declined to sell, but it is understood that the Conservative party will now have the first opportunity to buy Earncliffe should it so desire. The decision will probably rest with Hon. R. B. Bennett, Conservative leader.

The proposal that the imposing building should be made a shrine to the memory of the Fathers of Confederation is being made these days. Let it be filled, it is suggested, with the most interesting memories of the men who welded Canada into a nation. Much has been said in the past concerning these men might be moved there. It could be on view for every visitor to Ottawa, who wished to wander through its rooms and learn of the days when the constitution of this country was being composed.

Another suggestion is that Earncliffe be extended and made the national art gallery. The gallery is now housed in the museum.

Turkey Raising

Dry Sections Of The West Ideal For

The largest turkey ranches of Canada are found in the Prairie Provinces, and the west is assuming more and more importance as a supplier of eastern requirements for turkeys at holiday seasons.

The dry sections and the unlimited space ideal for turkey growing. One man breeder in Alberta has sold 3,000 head of turkeys, the direct result of winning a pair in a raffle a few years ago, openly admits she knew nothing about turkeys when she got this pair.

She further states that the success of her husband is all attributable to the bulletins issued by the Federal Department of Agriculture.

It is unwise to put "all your eggs in one basket." Why not have a side line, that can be made profitable and that will provide an interesting and profitable occupation for the women-folk.

"Turkeys, their care and management" is a bulletin designed to help the beginner, which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

A few notes on the breeds, hints on management, fattening, and a chapter on diseases round out the subject. The bulletin is of interest to those already breeding turkeys, as well as to beginners.

To Conduct By Wireless

An invitation of Dr. Erich Fieber, a Swiss engineer, by which several orchestras in different countries are to be conducted simultaneously by wireless, will be tested in Zurich on September 1. Under Dr. Fieber's command, orchestras in London, The Berlin and Milan will unite in transmitting a new hymn composed for the tenth assembly of the League of Nations.

Wars in Mexico have cost 1,200,000 lives since 1910—all civil wars, too.

"Where did you get the idea for that picture?" "Of my head." "Then you must be thankful to be healthy again."—Hummel, Hamburg.

High Standard Maintained By Medical Profession Necessary To Retain Confidence of Public

(By Dr. Gordon Bates, General Secretary, Canadian Medical Association)

Who is a doctor?
How is that the governments and people of every civilized nation in the world single out one group of men—and nowadays, of women too—and say to them: "You are doctors, and in your hands we place our social and individual health. You and you alone may use the hallowed title, 'Doctor of Medicine,' and by virtue of that title, heal the sick and preserve the well."

Perhaps the best answer to that question is this: Imagine, if you can, the condition that would exist if the medical profession were not so highly recognized. Suppose that any man who had the audacious ambition to heal his fellow-men of their ills—could without any supervision call himself "Doctor" and begin cutting people up and dosing them with potations of his own concoction. What an epidemic of horrible deaths there would be! How quickly the public's respect for the medical profession would be lost! The title "Doctor" would be changed to the deepest distrust!

What then, is the medical profession, and how does it maintain this high standard that this great public confidence demands? Let us consider what the Province of Ontario expects of a man who would practise medicine. Its requirements are typical of those of the rest of Canada.

To become a medical student, one must first pass his honor matriculation. That takes five years. After that, he must spend another six years at a recognized medical school. It is hard to adequately suggest, in a sketchy article of this nature, the vast scope of a modern medical curriculum. The neophyte must learn physics, chemistry, biology, physiology, pharmacology, anatomy, histology (involving an understanding of the microscopic structure of the body).

From these basic studies, all of which, where they touch the human being, deal merely with the normal, the student then proceeds to pathology, the study of sickness, in its different aspects, pathological chemistry, bacteriology and immunology, medicine and surgery in all their branches, preventive medicine, hygiene.

It is still harder for the reader to appreciate the vast historical background, the great wealth and richness of meaning of all of those terms; of the tremendous accumulation of knowledge that a would-be doctor must painstakingly acquire. And when he has spent six long years acquiring it, it is then customary for him to spend one or more often two years as an interne in a hospital, so that a youth of nineteen who finishes his honor matriculation and starts to "go through for a doctor" knows that he will be about 28 before he starts earning anything. And even then, it will take him another five years before he begins to earn more than enough for the ordinary necessities of life.

Which means that a doctor doesn't begin to earn anything to speak of, as a rule, till he is "thirty-three!"

In the meantime, he has spent from six to eight years learning his profession, he has had to master all the old, as well as all the new branches of medicine; he has passed a number of strict examinations—made extra stiff in order to keep an already crowded profession from becoming over-crowded. And from this extraordinary severity of examination, the general public is obviously the greatest gainer, since only the more intelligent, reliable student succeeds in passing.

He has spent an absolute minimum of \$1,000 a year for six years, including \$150 tuition, \$100 for books and equipment, which leaves very little for room, board, clothing and incidentals, to say nothing of amusements.

"Please sir, I have just run over your member-in-the-club."
"How much reward are you claiming?"
—Gutierrez, Madrid.

W. N. U. 1798

Railway Officials

Receive Promotion

Important Changes in Personnel of Operating Department On the Canadian National

Changes of major importance in the personnel of the executive of the operating department of the Canadian National Railways in Western Canada took place on August first, according to a circular issued by Sir Henry Thornton, president, and B. J. Hungerford, operating vice-president of the company at Montreal. The changes are as follows:

A. E. Warren, general manager, Central Region, Toronto, to be vice-president of the Western Region, with headquarters at Winnipeg.

W. A. Kingsland, general manager, Western Region, Winnipeg, to be general manager, Central Region, with headquarters at Toronto.

Col. T. A. Heath to be assistant to the President, with headquarters at Vancouver; to represent the executive in British Columbia, and collaborate with all departments in matters affecting the company's interests.

A. A. Tisdale, assistant to the general manager, Western Region, Winnipeg, to be general manager Western region, with headquarters at Winnipeg.

C. J. Cameron, assistant general manager, Western Region, Vancouver, will, at his own request, retire on superannuation after many years of service.

B. T. Chappell, general superintendent of the Saskatchewan District, with headquarters at Saskatoon, to be general superintendent of the British Columbia District, with headquarters at Vancouver.

C. J. Forrester, superintendent at London, Ontario, to be general superintendent of the Saskatchewan District, with headquarters at Saskatoon.

The appointment of a vice-president in charge of the western region of the company has been under advisement by general headquarters for some time, and it is a step which meets the general desire of the business men of the west. Mr. A. E. Warren needs no introduction to the west. Most of his railroading experience has been acquired west of the great lakes, and following amalgamation in 1922, he was general manager of the Western Region until his transfer to Toronto in 1926.

The transfer of Mr. W. A. Kingsland to Toronto as general manager of the Central Region, will be a regretted, even though the change places him in charge of probably the heaviest traffic section of the system. During the time he has been in the west, he has succeeded in gaining the confidence and friendship of the business men on all parts of the line as well as the loyalty of the entire personnel under his control. Under his guidance the lines of the western region have shown splendid financial results during the past three years, the returns for the last year being the highest in history.

The new general manager of the western region, M. A. A. Tisdale,

was born in Mount Vernon, Ont., in 1874, and has been in the service of the Grand Trunk and Canadian National Railways since 1890, having worked his way by sheer ability from an apprentice in the shops at Hamilton, to the position he now holds. He has been in the west since 1909, at which time he was superintendent for the Grand Trunk Pacific at Fort William, from which post he was transferred to Winnipeg as assistant to the vice-president and general manager in 1916.

In the retirement of J. R. Cameron, the company loses the service of one of its oldest and most valuable officers. Mr. Cameron joined the Canadian National Railways as a conductor in 1889, and steadily worked upward through the operating department to the position he is relinquishing at his own request.

Like most of the other executive officers of the company, R. T. Campbell also won his way up the ladder. He has been in the service of the company since 1895, and has seen service in various capacities in Winnipeg, Port Arthur, Ruby River, North Battleford, Vancouver and Saskatoon.

The Prairie Garden

Shelter Belts Are Essential For Successful Vegetable Growing

The prairie farmer who figures on having a vegetable garden must consider the planting of a shelter belt of trees and shrubs to protect the growing vegetables from the winds. The planting of a shelter belt is not necessarily a common-sense idea of the garden operations. A full discussion on this subject appears in Bulletin No. 42, entitled "The Prairie Farmer's Vegetable Garden," which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

Large trees are objectionable close to the garden, and shrubs and hedges are more suitable close to the growing vegetables.

Every farmer should endeavour to make the farm supply the family table, and aim to make this supply measure up to the standard of good living. Vegetables play a big part in this living, and they are increasing in popularity every day.

The economic side of the question is also important. In many sections the cost of the vegetables is expensive and varies considerably from place to place. The farm vegetable garden does not make any great labour demands, does not require special equipment, can be looked after in spare time, and is interesting and profitable.

Figure on that shelter belt, and a vegetable garden.

Losses From Insects

The Dominion Entomologist, Mr. Arthur Gibson, estimates that the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to food crops and to it must be added the loss to forest and shade trees, stored products, etc. While these latter losses are difficult to estimate, they easily average over \$50,000,000 a year.

Barley is believed to have originated in Central Asia.

Investigation By Scientists Is Under Way To Breed New Hardy Fruits For the North

A. A. TISDALE, General Manager, Western Region, Canadian National Railways

Investigation by American scientists is under way to breed new hardy fruits which may grow in Canada's northern zone. This was disclosed at The Bus, Man., by K. A. Ryerson in charge of the office of foreign plant material, United States Department of Agriculture.

Mr. Ryerson arrived in town to lead a party up the Hudson bay line to select plants and fruits for scientific investigation. He will be accompanied by Prof. W. H. Alderman, head of the Horticultural Division of the University of Minnesota, and W. R. Leslie, in charge of the Dominion Experimental Farm at Morden.

The party expects to be gone a month and will take Churchill in their itinerary.

The scientists explained the importance of the trip to the fruit growers of the middle western states.

The climate of that area is such that only hardy fruits and berries can be grown," he explained. "The winters are very cold and the falls early. To meet these conditions, new fruits must be bred by cross pollination and hybridizing.

Science gave faberism something new to play with when word arrived from Bermuda of successful use there last week of radium as a lure for deep sea fishing.

The radium was used by William Beebe, New York naturalist, as a luminous coating on hooks attached to sounding wires about a mile deep, in depths where no daylight exists.

The first catch was a squid, a member of the octopus family. It was large enough to fill a fair-sized fish basket.

Two New Ranges Have Been Located By Echo

Surveys of the ocean's bed have discovered two new mountain ranges which they have accurately mapped and measured says an article in Pearson's Weekly. All the credit for the discovery is really due to that elusive subject—the echo. Shells that explode on striking a solid substance were first at the bottom below.

Calculating the time that it took the echo of the explosion to penetrate a range of mountains capped, not by snow, but hundreds of fathoms of ocean. One of these ranges lies about one hundred miles from the coast of Ecuador and is considerably over five thousand feet in height. The other range of mountains has been discovered some distance in the north of Juan Fernandez, and rises to a height of nearly ten thousand feet!

Failed To Work

The gentleman's dinner check was three dollars. The gentleman gave the waiter a ten-dollar bill. The waiter brought back the change on a little tray—some bills, some silver, and a small napkin, folded. The gentleman left. The tip was about to depart when he was inspired to count the change. It was a dollar short. He summoned the waiter, who began to conduct a search, which ended with the discovery of two half dollars in the fold of the napkin. This greatly surprised both the gentleman and the waiter.

To Teach In Arctic

Miss Bessie Quirt is going to Shingle Point at the mouth of the Mackenzie River on the Arctic ocean as a teacher in the first residential school to be opened for Eskimos in Canada. She will be one of a party to leave Toronto. Miss Quirt's home is in Orillia. She expects to stay for five years in the Arctic.

How Not To Keep Idle

Investigation by American scientists is under way to breed new hardy fruits which may grow in Canada's northern zone. This was disclosed at The Bus, Man., by K. A. Ryerson in charge of the office of foreign plant material, United States Department of Agriculture.

Mr. Ryerson arrived in town to lead a party up the Hudson bay line to select plants and fruits for scientific investigation. He will be accompanied by Prof. W. H. Alderman, head of the Horticultural Division of the University of Minnesota, and W. R. Leslie, in charge of the Dominion Experimental Farm at Morden.

The party expects to be gone a month and will take Churchill in their itinerary.

The scientists explained the importance of the trip to the fruit growers of the middle western states.

The climate of that area is such that only hardy fruits and berries can be grown," he explained. "The winters are very cold and the falls early. To meet these conditions, new fruits must be bred by cross pollination and hybridizing.

Science gave faberism something new to play with when word arrived from Bermuda of successful use there last week of radium as a lure for deep sea fishing.

The radium was used by William Beebe, New York naturalist, as a luminous coating on hooks attached to sounding wires about a mile deep, in depths where no daylight exists.

The first catch was a squid, a member of the octopus family. It was large enough to fill a fair-sized fish basket.

Two New Ranges Have Been Located By Echo

Surveys of the ocean's bed have discovered two new mountain ranges which they have accurately mapped and measured says an article in Pearson's Weekly. All the credit for the discovery is really due to that elusive subject—the echo. Shells that explode on striking a solid substance were first at the bottom below.

Calculating the time that it took the echo of the explosion to penetrate a range of mountains capped, not by snow, but hundreds of fathoms of ocean. One of these ranges lies about one hundred miles from the coast of Ecuador and is considerably over five thousand feet in height. The other range of mountains has been discovered some distance in the north of Juan Fernandez, and rises to a height of nearly ten thousand feet!

Failed To Work

The gentleman's dinner check was three dollars. The gentleman gave the waiter a ten-dollar bill. The waiter brought back the change on a little tray—some bills, some silver, and a small napkin, folded. The gentleman left. The tip was about to depart when he was inspired to count the change. It was a dollar short. He summoned the waiter, who began to conduct a search, which ended with the discovery of two half dollars in the fold of the napkin. This greatly surprised both the gentleman and the waiter.

To Teach In Arctic

Miss Bessie Quirt is going to Shingle Point at the mouth of the Mackenzie River on the Arctic ocean as a teacher in the first residential school to be opened for Eskimos in Canada. She will be one of a party to leave Toronto. Miss Quirt's home is in Orillia. She expects to stay for five years in the Arctic.

Large Co-Operative Turnover

Total Sales Of Agencies In Saskatchewan Reaches High Figures

Total sales of all the larger co-operative agencies in Saskatchewan amounted during 1928 to \$176,640,000. The volume of business transacted by producer co-operatives in Saskatchewan last year were: Saskatchewan Wheat Producers, Limited, \$102,000,000; Co-Operative Creameries, Ltd., \$5,000,000; Livestock Producers, Ltd., \$1,918,000; Co-Op. Trading Association, \$1,550,000; Municipalities, \$1,550,000; Poultry Producers, Limited, \$553,000; Registered Seed Growers, Ltd., \$281,000; Canadian Co-Op. Wool Growers, Ltd., Saskatchewan branch, \$180,000; a grand total of \$176,640,000.

Manitoba Poultry Marketing

When the Manitoba Co-Operative Poultry Marketing Association, Ltd., began operation in 1922, the first year's shipments totalled five cars of dressed poultry. Last year the association shipped 72 cars of dressed poultry, 10 cars of live poultry, and 135 cars of eggs to markets in Eastern Canada and the United States. The organization now has a membership of over 12,000 farmers and their families throughout the province of Manitoba.

The Singing Fool

By HUBERT DAIL

Copyright, 1935, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, takes a party of four to Blanche Joe's New York night club. Al Stone, Blanche's chief comedian and singing waiter, is desperately in love with Molly, the ballad singer, but she scornfully rejects him. Then she goes to the Marcus table and tries to ingratiate herself with the great producer. In a despairing effort to touch Molly's heart, she goes on the floor and sings a love ballad he has written for her. The song is a sensation and Marcus calls for Al and offers to buy it. Meanwhile Molly has made up to Al and the latter refuses to sell the song unless Molly will allow him to be the headline in a Marcus review. Marcus consents. Grace, the cigarette girl, who is deeply in love with Al, is in the background.

CHAPTER VIII

As Al heard Marcus's words he turned quickly and beamed on Molly. He realized he had won—Marcus would not only take the song, but he would make Molly a headliner. Tears of excitement and gratitude filled Molly's eyes. After all, she was not a woman of stone; she did appreciate the gallant stand her singing waiter had made in her behalf.

Now Al became aware of a clatter behind him, in front and all around. The crowd saw him at Marcus's table and refused to be so deafening. The applause poured on the tables, and their voices came in monotonous, insistent, rising chants. "We want Al! We want Al!"

Al rose and looked around. "You'll have to give them one, another," said Marcus, smiling. "Have you any more songs ready?"

"Yes, I have others," Al replied. Then he saw Blanche approaching. "Can't you give them something else?"

Al nodded and Blanche advanced to the center of the floor. "Lad-ies and gentlemen—his powerful voice filled the room—Al Stone, the world's premier singing waiter, is going to entertain us with another number of our own composition in response to your insistent demands."

Al advanced to the piano, drew from his pocket a number of ballads, and selected "I've Got a Rainbow Round My Shoulder." Could he put this one over too? Yes, he was sure he could—so quickly is self-confidence born as soon as success is once achieved.

And, true to his feeling, he swept through the song to another triumphant conclusion, while his eyes remained fixed on him in rapturous adoration.

... The night was ended at Blanche Joe's—Marcus and his party had gone and the last of the other customers had vanished too. Waiters were hurriedly piling chairs on tables, scrub-women appeared

with buckets and mops, lights were dimmed.

In a tiny dressing room at the back of the building, Grace, the cigarette girl, had taken the tray from her shoulder, balanced her accounts for the evening and slipped into simple and inexpensive blue serge dress.

Generally Grace had a good natural color, but this morning the pale sunlight, slanting through her dressing room window, revealed her face as dead white. So she put on more rouge than usual, to accentuate the beauty front she felt must command.

Yet as she pulled her tight-lacing little blue velvet hat down over her dark hair and slipped into her coat, these words were beating in her brain:

"He's in love with Molly—and he means to marry her!"

Over and over again the words sounded, like a dirge. And they seemed to take on rhythm, the rhythm of "Always," the love ballad Al had sung to Molly.

Grace heard footsteps in the hallway and turned to confront Blanche Joe. There was good old stout Blanche, gazing at her with kindly eyes. Finally she said:

"How do you feel, little one?"

She couldn't say she felt splendid; she didn't have the strength to say it, and she knew Blanche wouldn't believe it.

"Listen, Grace," suggested Blanche, "don't take things so hard. I know how you feel toward Al. I don't think I've been watching you and sympathizing with you? But you're beating your head against a stone wall."

"I know it," Grace tried desperately to keep her lips firm. "I've thought things all out—I realized tonight there wasn't a chance for me. But I can't stop loving him just because he loves Molly."

"You can't quit, at this moment, maybe," answered Blanche, "but you'll be able to, soon. You're only a kid, and you'll find someone else. I know—I was once a kid myself. With me it was on with a new one and off with the old one every month or two."

"That may be true of you," said Grace, wearily, "but I think I know myself. I'll bet you I never love anyone but Al—I know I won't."

Blanche laughed, came over and patted her on the head. "But don't you tell Al about that!" continued Grace, with passionate emphasis. "I don't want him to know that I feel toward him—I want to keep his happiness. And, above all things, I want Al to be happy! He's been wonderful to me—why, he's the best, kindest, best-looking man I've found. Promise me you'll keep mum about me, Blanche!"

"Not a word, kid," said Blanche reassuringly. "I know how he feels toward me," Grace went on. "I'm just like a younger sister to him. I wish him all the happiness in the world. I know he'll be leaving us. I've lost out forever—and that's that!"

"Don't be too sure," Blanche remonstrated. "What do you mean?"

"I don't mean nothing" except—well, forever's a long time."

Grace rose and moved listlessly toward the door.

"Thanks for taking an interest, Blanche. See you tonight. So long!"

"So long," Blanche looked after the sagging little figure that was usually so lithe and vibrant with vitality. He shook his head sadly.

Grace, passing through the serpentine corridors, heard voices—the voices of Al and Molly. They were talking in Molly's dressing room. She did not mean to listen, yet she stopped as she heard Al say enthusiastically:

"We can't lose Molly. Marcus will sign us up tomorrow and we'll move over to the bright lights and the big money. Then we'll get married. That will be the happiest day of my life, darling!"

"Yes," came Molly's eager voice. "I'll get married and we'll go to the very top. Al, I've always known you had it in you. When I heard you sing tonight, I was sure!"

The faint flicker of an unbelieving smile crossed Grace's face, but she made no sound. Then came Molly's voice again:

"We'll leave this dirty hole cold—right away—tomorrow."

At this, Al paused. Then he remonstrated.

"So soon, Molly? That wouldn't be fair to Blanche. He's done a lot for you and me. It's true I thought of quitting tonight, but that was because I believed you didn't love me. And I couldn't stand the thought of staying. Now it's different; let's give Blanche some notice, be square with him the way he's been with us. After all, he's had faith in both of us."

"Al, right," agreed Molly grudgingly, "but I hate this tough place."

She hurried along the narrow streets toward her lodging house in the Village, several blocks away. Her thoughts were full of Al and her love for him; she realized that she didn't reach home quickly she would burst out crying on the street.

When she stood in her black, shabby dressing room, and confronted her reflection in a mirror, she cried passionately:

"That girl's no good! She'll never make him happy! And, oh, I love him! So I would have worked so hard to help him!"

(To Be Continued.)

Queer Ideas Of Sport

Some Men Think Of Wild Life Only As Something To Shoot

Some men have queer ideas of sport. There was a classic cartoon in "Punch" once, showing two Englishmen looking out of a window, and the first remarked, "What a lovely day!" "Yes," said the other; "let's go out and shoot something!"

Some men have no conception of the value of nature. To them trees and mountains are just trees and mountains are not a landscape. To them the mountains are just trees and mountains are not a landscape. To them the mountains are just trees and mountains are not a landscape.

The Prince of Wales goes in for strenuous sports, but he is not particularly addicted to shooting.

Wild beasts must be kept within reasonable numbers to prevent them assuming domination over man. But when appeals have to be made to save certain species of animals from extinction, because often kill for killing's sake, it is a telling indictment of those who call themselves "sportsmen."

As Itemized

The expert had been called in when the factory machine broke down. He took one look, made two taps with a hammer and started it in perfect order. The owner was indignant to get a bill for \$50, and demanded an itemized account. He got this:

Tapping with hammer..... \$1.00
Knowing where to tap..... \$4.00

Total..... \$50.00

A Poor Housekeeper

Mrs. Smith: Mrs. Brown, lend me a drop of vinegar?

Mrs. Brown: I'm sorry, but I haven't any in the house.

Mrs. Smith: What a bad housekeeper you must be. Whenever you go to borrow a bit of anything, you haven't any.

Spanish applause consists of a peculiar hiss.

Minard's Liniment for Summer Colds.

Objections To Skyscrapers

Create Traffic Problems By Congestion and Shut Out Air

It is reported that skyscrapers of one hundred and fifty stories are contemplated by American architects, with colored stone which will merge in blues and pinks into the clouds. People looking up at them will scarcely be able to tell where the stone ends and the sky begins.

Chicago is said to be protesting against a building which, with its tower, will attain one hundred stories. The commissioner of buildings only recently revoked a permit to build one of sixty stories.

Skyscrapers are undeniably fine monuments to the skill of architects, but there must be halt somewhere if city life is not to become intolerable. They have two main objections.

One is that these vast structures house day workers to the number of ten thousand or more, and when they spring up in groups, which they have a habit of doing, they bring together in restricted areas vast numbers of people, sufficient to be the population of cities of a large city, and create traffic problems that baffle the wit of man to handle.

The second is that the erection of these tremendous walls of stone, reaching to the clouds, shuts out the air and renders the atmosphere enervating to all those whose lot it is to spend their working days within those areas.

There is also a fire menace, although fireproof construction renders that a minor matter.

Still, there was a bad fire two years ago in the top of a skyscraper in New York which was in process of construction at the time, and there is something to be said for the point of view of conservative Old London, whose laws decree that no building shall exceed one hundred feet, because fire equipment is not competent to deal with fires at greater heights, and that human lives are endangered by tall buildings in such circumstances.

May Never Be Renewed

Harvesters' Excursion To West Is Likely Thing Of The Past

The harvest hands' excursions to the West will be discontinued for this year at least. They may never be renewed. For a series of good crops has brought a rush of labor-saving machinery to the prairies. And the "combine" that threshes as they reap have done away with a tremendous amount of manual labor on the farm.

And if the harvest hands' excursions have passed into history the next generations of Canadians will have lost a splendid opportunity to see Canada East—Toronto Telegram.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little one as the summer. The excessive heat, the long days, the lack of sleep, the sun so quickly that unless prompt action is taken the baby may be beyond all human help before the mother realizes he is ill. Summer is a time when diseases such as infantile, diphtheria and colic are prevalent. The baby's system may be so weak that it may not be able to stand the heat. The baby's system may be so weak that it may not be able to stand the heat. The baby's system may be so weak that it may not be able to stand the heat.

Okanagan Valley Fruit

Fruit conditions throughout the Okanagan Valley are promising. There has been some drought injury to apples and some hail damage, but on the whole the yield is expected to be a satisfactory one. Onions also are making a good yield.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few cure to deal with it, considering it work for a doctor. Dr. Thomas' Ear Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

The Man For The Job

The Department Manager: We've have to fire that new salesman. He's asleep most of the time.

The General Manager: No, don't fire him. Send him up to the clock section. We can use him there demonstrating alarm clocks on him.

Little Helps For This Week

New Zealand Butter Trade

Dealers Plan To Supply Canadian Market All Year Round

New Zealand, having obtained a foothold for butter in Canada, is preparing to take further advantage of it. The Auckland Sun states that one of the largest dairy operators, who controls about one-third of the produce shipped from that dominion, is engaged in a scheme to control at least fifty-five per cent. of the output.

It adds that alliances have been formed with Australian houses, that advertising has been arranged in Canada and the United Kingdom and that "a recently-concluded agreement provides that New Zealand butter will be on the Canadian market all the year round."

He who believes that God's will must be done prays not when this or that event arises, but prays that, more and more, he may come into harmony with it. And out of this constant prayer of the soul that desires not gifts from, but communion with the Giver, there comes a sense of trust—Francis B. Hornbrook.

No Business Depression

Business and Industry Expected To Continue At High Level Throughout the Year

"In the early months of 1929 there were a number of factors in the Canadian business situation, such as the low price of wheat and the tightness of money, which seemed to portend at least a minor recession in the business activity for the balance of the year, but, somewhat contrary to general expectations, business and industry have continued at a high level throughout the spring and early summer," say the monthly business review of the Royal Bank of Canada. "With the severe credit strain somewhat relieved and with wheat prices at a much more satisfactory level, there is no question but that prospects for the remainder of the year have shown substantial improvement."

"The confidence that profitable wheat prices will be obtained after the coming crop has done much to cheer the gloom caused by the decrease in the size of the crop," says the report.

NEVER wait to see if a headache will "wear off." Why suffer when there always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every druggist always has genuine Aspirin Tablets for the prompt relief of a headache, cold, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

Too Much ACID

PHILIPS' PINKETTES

Many people, two hours after eating, suffer indigestion as they eat. It is usually excess acid. Correct it with an alkali. The best is the quick, harmless and efficient way, is Phillips' Alkali of Magnesia. It is made for 50 years the standard with physicians. One spoonful in water dissolves many times its volume in stomach acids, and at once. The symptoms disappear in few minutes.

You will never use crude methods unless you know this better method. And you will never suffer from excess acid unless you prove out this easy relief. Please do that—for your own Phillips' Alkali of Magnesia. It is made for 50 years the standard with physicians. One spoonful in water dissolves many times its volume in stomach acids, and at once. The symptoms disappear in few minutes.

The New CHEVROLET Utility 1½ Ton TRUCK

The illustration shows the Utility 1½-ton truck equipped with combination body.

The Six Does Better What the Four did Well

TO the well-known Chevrolet qualities of stamina, dependability and economy, the new Chevrolet Truck adds the further advantages of smooth, six-cylinder operation . . . extra-rugged chassis construction . . . the superb speed and pulling power of a newly-designed four-speed transmission . . . ball-bearing steering mechanism . . . new, four-wheel brakes that are sure and positive in action. Although it is a better truck, a sturdier truck, a truck that gives true six-cylinder performance . . . this new Chevrolet Utility Truck (with its 1½-ton capacity) is still offered within the price-range of the four.

Ask for a complete performance and maintenance record of this amazing truck . . . and learn how it can save money for you. C117-A-25C

Mr. and Mrs. J. J. Purcell left last Monday for Calgary by motor to spend a few days in the city.

Miss Mildred Cates, who has been visiting in Powell River, B.C., during the last month, arrived in Oyen this morning.

Mr. and Mrs. E. D. Thygesen and family returned to Oyen last Saturday evening after an enjoyable motor trip to the Pacific coast.

Miss E. Caswell and her mother, who have been guests at the home of Mr. G. Caswell, left this morning for Juniata, Sask.

Miss Nina Bond of Medicine Hat is a guest at the home of Mr. and Mrs. Harvey C. Johnson.

United Church Building Fund

Subscriptions to the Oyen United Church Building Fund are now being called in, and all those on the list who have not already done so are asked to give their subscription or mail same to the treasurer of the building fund, Mr. Chas. L. Dunford, Oyen, or hand same to any member of the building committee.

At Oyen Theatre

The story of "Uncle Tom's Cabin", showing as a motion picture at Oyen Theatre Friday and Saturday this week, was written by Harriet Beecher Stowe, in the year 1852. Since first being launched as a stage play, it is estimated that over 2200 stock companies have played it on the road. Now you can see it in the movies, a tremendous thrilling drama, far surpassing in beauty and grandeur any stage setting previously presented. Its heart throbbing tenderness and pathos, its thrills and supremely dramatic moments—just as it came from the pen of its noble author—will entrance you. Let all members of the family see this remarkable screen vision of "Uncle Tom's Cabin."

Here and There

(1921) Canada has one motor vehicle for every nine persons of population. A recent estimate places the average number of motor vehicles in the Dominion at 1,075,819. Only three countries exceed Canada in heavier density of motor cars: namely, United States, with one for every 6.1 persons; Hawaiian Islands 7.9 persons, and New Zealand 8.0 persons.

The New England conscience got busy recently in a small town in Massachusetts when a resident mailed back anonymously to the maître d'hôtel of the Royal York Toronto, a package of spoons, serviettes and dining room "undies," borrowed some time previously. The writer, in returning the article to Monsieur Mollard, the maître said: "My conscience has been bothering me a great deal since and I have been unable to keep them any longer."

The Stony Indians, Alberta cannot be said to be a "vanishing race," for while the section of the tribe living on the Stortzen reserve was making a two-week trek to attend the annual Indian pow-wow at Banff, four babies were born. Mothers and children are all healthy and well.

Last spring a man came into the C. P. R. ticket office on Sparks street, Ottawa, for a ticket to Leonard where he had a job. He was five cents shy on his fare, but the railway gave him a ticket and away he went. The other day a man in overalls walked into the Sparks street office and said: "I owe you five cents on a ticket; here it is."

Hon. Chas. Stewart, Minister of the Interior, who has been lying over the Rocky Mountains recently, announced at Banff that the half-falo herd there will be augmented shortly by addition of animals specially selected from the herds at Watnwright and Elk Island.

Canadians are the world's greatest butter eaters. A recent consultation made by the Canadian Government Bureau of Statistics shows that the total consumption of butter in the Dominion last year was 236,000,000 pounds or a per capita consumption for the year of 27.21 pounds, an increase of nearly half a pound per head of population compared with 1927.

J. M. Fairbairn, chief engineer, Canadian Pacific Railway, and Dr. F. A. Gaby, chief engineer, Ontario Hydro-Electric Commission, have been selected as Canadian delegates to the Twelfth sectional session of the World's Power Conference to be held in Japan in October. They were nominated at a meeting of the Canadian executive conference committee.

The steady increase in the use of electric power per capita in Canada is shown by a comparison of the figures for 1920 and 1927. During this period the amount of power used per 100 of population increased from 45 to 65 horse-power, or the use of power per inhabitant increased over 40 per cent.

As an indication of the increasing popularity of Nova Scotia as a tourist resort, the Lord Nelson Hotel, Halifax, on July 15 set three records for meal service with 245 persons sitting down to breakfast, 259 for luncheon, and 270 for dinner.
